EXIT READER MODULE

EXITRDR

Our EXITRDR Exit reader module is a flexible, convenient and inexpensive way to control and track cardholder access in both directions through the same door.

EXITRDR module is compatible with panels in AxiomLite™ and Integra32™ product lines and does not reduce maximum wiring distance between reader and controller.

A single cable is required to connect both readers, reducing cost and making it possible to use existing wiring to add in/out tracking capability to existing doors.

Module conveniently fits inside a standard single gang electrical box and is a neat way to terminate reader wiring. Removable connectors will make an unlikely replacement of this module a snap!

EXITRDR

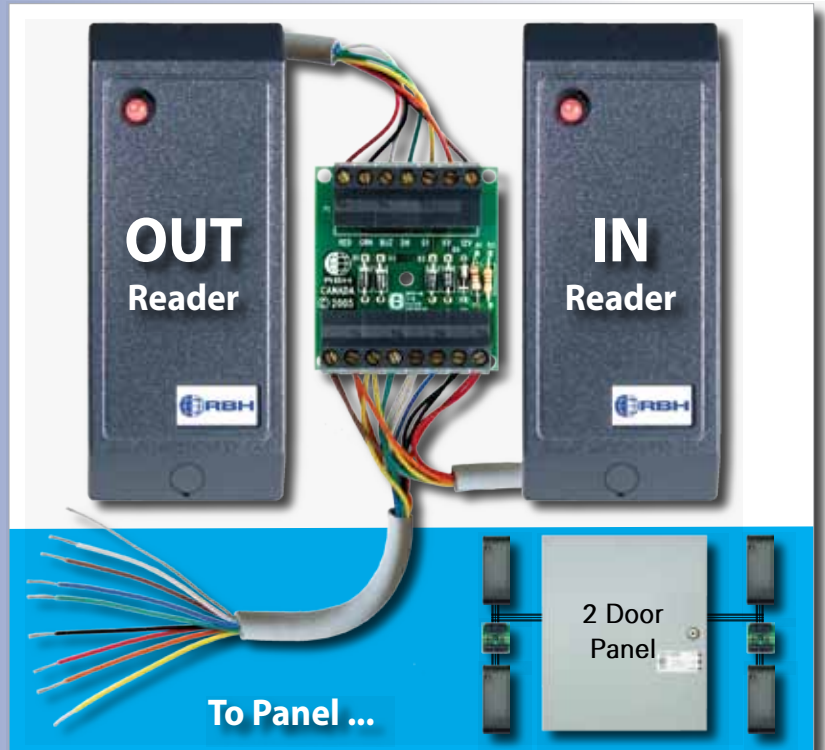

Exit Reader Module

Great features:

- Door In/Out control & tracking
- Low cost full Anti-passback
- One cable - two readers!
- Compact, robust design
- Same reader wiring range
- Low power consumption
- **LOW COST!**

SPECIFICATIONS :

Compatibility :	IRC-2000-4 URC-2000
Power Consumption :	10mA @ 12VDC
Dimensions	Length : 51 mm (2") Width : 46 mm (1 13/16") Height : 20 mm (13/16")

Use with  **Axiom Lite™ Integra 32™**
