# Yale® The world's favorite lock

Digital Rim Lock
YDR 3110

YDR3110
Front Body
19(D)x65(W)x160(H)mm
Back Body
36(D)x158(W)x85(H)mm

Various access
Yale YDR3110 has three access solutions, PIN code, RF card key and Remote Control (optional) for your convenience.

Invisible keypad
Keypad can be seen only when you touch the screen with your palm.

Operation status notification
Whenever any operation is made, the keypad informs you what has happened through different alignment of the numbers.

Missing key invalidations
Once you lose your key, it has no validation as long as you re-register rest of your keys.

Automatic locking
The Yale series automatically locks the door after checking it is properly closed.
(Manual operation is also available.)

Alarm (break / damage / fire)
80db alarm goes off if anyone attempts to damage the lock or force the door open, or if the lock detects over 60°C.

Low battery and emergency power supply terminal
It warns in case of low battery with alarm and LED. When the batteries are completely discharged, you can easily supply emergency power to the lock with the standard 9V battery.

Smart Touchpad
To prevent the password from being exposed due to residual fingerprints after opening the door, a new technology has been adopted to complete the door opening process by touching the keypad with a palm after entering the password.
